FERRET DIETS

There are many diets available on the market for ferrets, including both diets formulated specifically for ferrets and those for cats. The following list has brands which are considered excellent and have been observed to allow ferrets to not only survive but thrive. The diets listed below are around 40% protein and 75% animal ingredients, with those listed first being closer to this ideal. This is very important because ferrets are true carnivores like cats and will not do well on diets high in carbohydrates. Most of these foods are also “grain-free,” though not all diets labeled “grain-free” are necessarily high quality. This list was created by looking closely at the ingredient lists of various diets used for ferrets over the years.

Wysong Ferret Epigen 90: chicken, chicken meal, chicken fat, chicken giblets, gelatin, apples

Innova EVO cat and kitten: turkey, chicken meal, chicken, herring meal, chicken fat, peas
