Pre-Surgical Work-up

To maximize anesthetic safety and minimize any risk of surgical complication to your pet, we recommend pre-surgical blood work to ensure that your pet's organs are functioning properly and to reveal any hidden health conditions that could put your pet at risk. Performing a chemistry panel, complete blood count (CBC), and/or full body radiographs allows us to evaluate your pet's overall health. Testing can: (1) significantly reduce medical risk, (2) allow us to proceed with confidence by knowing that results are within normal ranges or by knowing the necessary precautions and adjustments to make, (3) provide baseline level for future reference, and (4) help give you peace of mind regarding your pet's procedure.

Choose One option - may not be reflected in current estimate

I approve the complete pre-surgical work up (chemistry panel, CBC, X-ray) at a cost of **\$186.45** _____ *(initials)*

I approve only the pre-surgical chemistry panel and complete blood count at a cost of **\$135.00** _____ *(initials)*

Surgical/Anesthetic Waiver
